

1. Project Overview

Project Name: Parabank Banking Application
Application Type: Web Application
Objective: To test core banking functionalities such as user registration, login, account overview, fund transfer, and bill payment to ensure the application works as expected.

2. Scope of Testing

In Scope:

- User Registration
- Login & Logout
- Account Overview
- Fund Transfer
- Bill Payment
- Loan Request
- Navigation & UI validation

Out of Scope:

- Performance testing
 - Security testing
 - Mobile testing
-

3. Testing Types

- Functional Testing
 - Regression Testing
 - Smoke Testing
 - UI Testing
-

4. Tools Used

- Browser: Safari
 - Test Case Management: Google Sheets
 - API Testing: Postman
 - Database: SQL (if applicable)
-

5. Test Approach

Testing will be performed manually by executing predefined test cases. Each feature will be tested for expected functionality, validations, and edge cases. Bugs will be identified and documented with clear steps and expected vs actual results.

6. Entry & Exit Criteria

Entry Criteria:

- Application is accessible
- Test environment is ready
- Test cases are prepared

Exit Criteria:

- All test cases executed
 - Major bugs identified
 - Test summary report created
-

7. Defect Management

Bugs will be reported with:

- Bug Title
 - Steps to Reproduce
 - Expected Result
 - Actual Result
 - Severity & Priority
 - Screenshot (if applicable)
-

8. Test Deliverables

- Test Plan
- Test Scenarios
- Test Cases
- Bug Reports
- Test Execution Report
- Test Summary Report
